Assembly Instructions

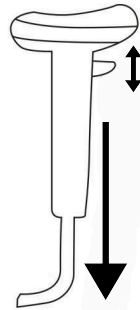

Mechanism Controls

- A. Height Control
- B. Tilt Control
- C. Backrest Control
- D. Bodyweight Tension Control
- E. Backrest Clamp Control

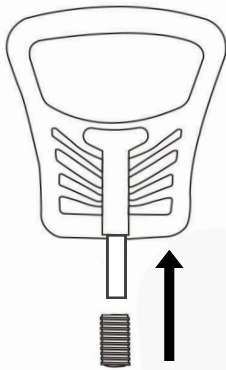

Armrests (If Included)

Only required if armrest have been selected/included. Pull up or press down to adjust the armrest height.

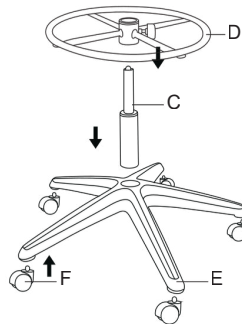

STEP 1

Slide the backrest cover onto the backrest shaft. This will cover the metal shaft.

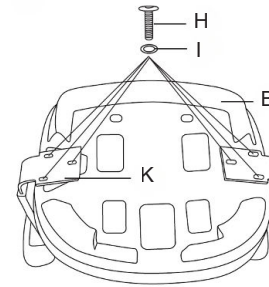

STEP 2

Place all casters into the base pushing the pin right into the hole until its firmly in place. Place gas lift into the centre hole in the chair base. Slide the drafting ring onto the top of the gas cylinder.

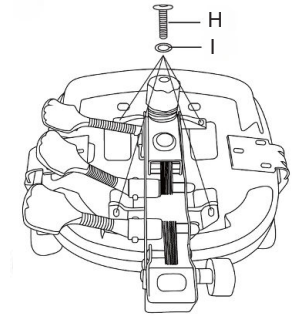

STEP 3

Optional Step. Only required if armrest have been ordered/selected. Assemble the armrests as shown below.

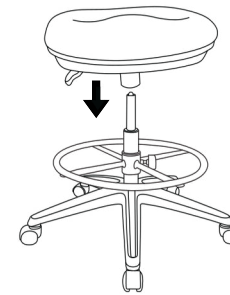

STEP 4

Assemble the mechanism as shown below.

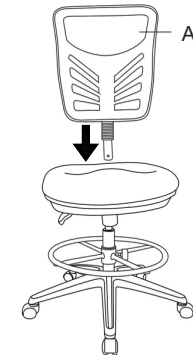

STEP 5

Place the seat onto the gas lift & chair base. Make sure the hole on the mechanism lines up with the gas lift and press firmly down on the seat once in position.

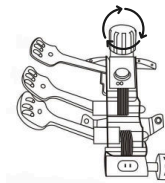

STEP 6

Assemble the backrest as shown below. Tighten the backrest clamp to secure the backrest firmly.

STEP 7

Sit on the chair and adjust the bodyweight tensioner to the correct setting so when you lean back on the backrest it doesn't move too quickly which can be dangerous.

WARNING! Only adjust the backrest tilt when the chair height is at the lowest position. Adjusting the backrest tilt when the chair height is not at the lowest position may result in serious injury.

Enjoy your Ergorite drafting chair!
